

# The Benefits

The Entrepreneurial Skills Pass is a forward-looking initiative. It aims at boosting the short and long-term impact of Europe's entrepreneurship education efforts. Thus, the ESP has benefits for both students, schools and employers.

- Students develop their creativity, their ability to generate ideas and turn them into action.
- They learn to work in a team, take initiative and accept responsibility by experiencing what it means to manage a real enterprise.

- The ESP offers schools a full package to support entrepreneurial learning outcomes including the mini-company programme.
- Teachers have access to international professional development and experts from the business community.

- The ESP certifies that a young person has had a real entrepreneurship experience and has had relevant competences, skills and knowledge to add value as a young employee.
- The ESP is a valuable complement to standard academic qualifications.

## The Impact

20 countries

+10,000 students

420 academic and vocational schools

250 businesses

“ Such experiences teach you life lessons which no textbook can ever do. I believe that opportunities like these are the stepping stone to success. ”

*Student from Malta*

“ The Entrepreneurial Skill Pass has totally changed the way I see life. Apart from the fact that I learnt how companies work both theoretically and practically, ESP helped me to realise how someone can bring business ideas from concept into reality. I also became aware of my abilities and talents, and helped me improve my capabilities. ”

*Student from Greece*

“ This whole year of entrepreneurship education taught me a lot. And now there is an offer to learn even more? For me the ESP further opportunities are absolutely amazing! ”

*Student from Czech Republic*
